

Rice Grading System for Embedded Image Processing

By Gurpreet Kaur

LAP Lambert Academic Publishing Okt 2014, 2014. Taschenbuch. Book Condition: Neu. 220x150x6 mm. Neuware - Providing recent advancements in designing Real-Time Imaging applications, Rice Grading System for Embedded Image Processing includes fundamental theory, soft-computing algorithms and extensive step-by-step guide to generate automatic HDL codes through Simulink®. The text includes the design of hardware compatible fixed-point codes for the development of automatic image processing based rice grading system. The topics covered are approached with the aim of reducing complexity in implementation of image processing operations on hardware platforms like FPGAs. Features flowcharts, code-snippets of fixed-point codes, VHDL source codes, images of qualitative results and tables of quantitative analysis Provides step-by-step guide to design & synthesize Simulink® models of image processing system for automatic generation of HDL followed by FPGA synthesization on Spartan6 Provides extensive literature review on embedded imaging from past 16 years. The book provides an exclusive approach towards the FPGA implementation of image processing based operations and will serve as a reference guide for development of handheld imaging devices 96 pp. Englisch.

Reviews

The publication is straightforward in study safer to recognize. It is written in straightforward words and never hard to understand. It has been printed in an extremely straightforward way and it is just after I finished reading this book through which basically modified me, affect the way I think.

-- Percy Bernhard

Thorough guideline! It's this kind of excellent read. This is certainly for all those who state there was not a well worth reading. Your way of life period will probably be transformed once you complete reading this book.

-- Mrs. Alia Borer
